

PROH₂O UV SYSTEM

BENEFITS:

- Eliminates up to 99.99% of Waterborne Microorganisms by using Ultraviolet Light
- Environmentally Friendly - No Byproducts
- Chemical Free
- Low Energy Use
- Clean
- Residential and Commercial Use

Ultraviolet Light works like this:

The ultraviolet rays attack harmful infectious microorganisms in your water, efficiently limiting their ability to reproduce.

UV systems are highly recommended to those who may suspect giardia, E. coli, cryptosporidium or other types of bacteria and viruses in their water.

| Operating Flow | Dose in $\mu\text{ws}/\text{cm}^2$ | Maximum Operating Pressure | Watts/ Voltage/ Hz Temperature | Maximum Operating Temperature | Port Size I/o | Visual Warning/ Audible Alarm |
|----------------|------------------------------------|----------------------------------|--------------------------------|-------------------------------|---------------|-------------------------------|
| 1.7 GPM | 30,000 | 8.0 Kg/Cm ² (116 psi) | 12W / 125V / 60Hz | 113°F (45°C) | 1/4" tubing | LED/ BIP Sound |

Housing: reinforced polypropylene; Filter Cartridges: 5 microns sediment filter & granular carbon activated filter; Water Chamber: stainless steel 304; UV lamp Rated life: 9,000 (hrs); High purity quartz tube.

Call any of our locations to find out more about our ULTRAVIOLET LIGHT purifying system.
