Quad-Plex with WS2 Valves on 30x72 Tanks

The perfect product for your commercial and industrial applications.
Quad-Plex with 2" Progressive Flow on 30x72 Tanks

- Continuous flow rate of 294 gpm, peak flow rate 460 gpm
- 2" Top mount control valve suited for commercial/industrial applications
- Lead free brass construction
- Economical stainless steel optional meter assembly
- (Optional) double backwash feature offers optimum regeneration, cleaning ability, and efficiency
- Fully adjustable cycle times with 6-cycle control delivers controlled backwash, downflow brining/slow rinse, second backwash, fast rinse, refill and downflow service
- Coin cell lithium battery back-up for time of day for the life of the battery
- Post treated water regenerant refill
- Programmable service call alarm

Your Charger Water Treatment Dealer:

cchargerwater.com
OPTIONS Available

- 2.0” NPT or 2.0” BSPT
- Durable 316 stainless steel casting
- Hydraulically balanced piston valve
- Allows for our 2” valves to be used in multi-tank systems
- Full 2.0” ports with minimal pressure loss
- Provides for no raw water bypass during regeneration
- Provides choices of treated or non-treated water regeneration for our 2” valves
- Proven and reliable AC drive assembly
- Low voltage drive assembly controlled by valve’s circuit board
- Flow from male inlet to female outlet has a 2.6 PSI drop at 125 gpm
- Operating pressures: 20 PSI minimum/125 PSI maximum
- Operating temperatures: 40°F minimum/110°F maximum

Options Available

Stainless Steel Meter

- 2” inline meter suited for commercial/industrial applications
- Stainless steel construction
- Service flow range 1.5 to 150 gpm (5.7-568 lpm)
- Meter accuracy ±5%
- Reliable and proven turbine design
- 15-foot cable included
- 2” male and female NPT or BSPT connection

System Controller

- System controller may operate 2-6 units
- Clack 1.0”, 1.25”, 1.5” or 2” control valves may be used
- No plug-in DC power supplies are required on individual valves; all connected valves will be powered by the system controller
- Remote, real time monitoring of system performance utilizing an onboard ethernet connection
- System diagnostic and programming information for spreadsheet presentation may be uploaded to a standard USB drive
- Two fused Single Pole Double Throw (SPDT) relays are provided
- Single demand-based meter output is provided
- Coin cell lithium battery backup for time of day
- Solid state microprocessor with user-friendly front panel programming
- Front panel displays for time of day, day of week, days until next regeneration, current system flow rate, and total system volume used (Totalizer)
- Front panel LED status indicators for online, standby, and regeneration
