TRI-PLEX WITH WS1.5 VALVES ON 21X62 TANKS

WATER TREATMENT SYSTEMS

Tri-Plex with 1.5" Progressive Flow on 21x62 Tanks
continuous flow 110 gpm/peak flow 180 gpm

- 1.5" Top mount control valve suited for commercial/industrial applications
- Lead free brass construction
- Economical stainless steel optional meter assembly
- **Continuous flow rate of 110 gpm, peak flow rate 180 gpm**
- Solid state microprocessor with easy access front panel settings
- Blue backlit dot matrix display with energy saver mode, backlight will automatically shutdown with 5 minutes of no button actuation
- Four methods to initiate regeneration; meter immediate, meter delayed, time clock delayed or pressure differential
- Optional double backwash feature offers optimum regeneration, cleaning ability, and efficiency
- Fully adjustable cycle times with 6-cycle control delivers controlled backwash, downflow brining/slow rinse, second backwash, fast rinse, refill and downflow service
- Coin cell lithium battery back-up for time of day for the life of the battery
- 15-volt DC power supply provides safe and easy installation
- Post treated water regenerant refill
- Programmable service call alarm
• 1.5” NPT or 1.5” BSPT
• Durable 316 stainless steel casting
• Hydraulically balanced piston valve
• Allows for our 1.5” valves to be used in multi-tank systems
• Full 1.5” ports with minimal pressure loss
• Provides for no raw water bypass during regeneration
• Provides choices of treated or non-treated water regeneration for our CD Matrix valve
• Proven and reliable AC drive assembly
• Low voltage drive assembly controlled by valve’s circuit board
• Flow from male inlet to female outlet has a 2.6 PSI drop at 125 gpm
• Operating pressures: 20 PSI minimum/125 PSI maximum
• Operating temperatures: 40°F minimum/110°F maximum

**OPTIONS Available**

- 1.5" inline meter suited for commercial/industrial applications
- 316 stainless steel electro-plated construction
- Service flow range .5 to 75 gpm (2-284 lpm)
- Meter accuracy ±5%
- Reliable and proven turbine design
- 15-foot cable included

---

- System controller may operate 2-6 units
- Clack 1.0", 1.25", 1.5" or 2" control valves may be used
- No plug-in DC power supplies are required on individual valves; all connected valves will be powered by the system controller
- Remote, real time monitoring of system performance utilizing an onboard ethernet connection
- System diagnostic and programming information for spreadsheet presentation may be uploaded to a standard USB drive
- Two fused Single Pole Double Throw (SPDT) relays are provided
- Single demand-based meter output is provided
- Coin cell lithium battery backup for time of day
- Solid state microprocessor with user-friendly front panel programming
- Front panel displays for time of day, day of week, days until next regeneration, current system flow rate, and total system volume used (Totalizer)
- Front panel LED status indicators for online, standby, and regeneration
