Tri-Plex with WS2 Valves on 30x72 Tanks

The perfect product for your commercial and industrial applications.
Water Treatment Systems

Tri-Plex with 2" Progressive Flow on 30x72 Tanks
Continuous flow 220 gpm/peak flow 345 gpm

- 2" Top mount control valve suited for commercial/industrial applications
- Lead free brass construction
- Economical stainless steel optional meter assembly
- Continuous flow rate of 220 gpm, peak flow rate 345 gpm
- Solid state microprocessor with easy access front panel settings
- Blue backlit dot matrix display with energy saver mode, backlight will automatically shutdown with 5 minutes of no button actuation
- Four methods to initiate regeneration; meter immediate, meter delayed, time clock delayed or pressure differential
- Optional double backwash feature offers optimum regeneration, cleaning ability, and efficiency
- Fully adjustable cycle times with 6-cycle control delivers controlled backwash, downflow brining/slow rinse, second backwash, fast rinse, refill and downflow service
- Coin cell lithium battery back-up for time of day for the life of the battery
- 15-volt DC power supply provides safe and easy installation
- Post treated water regenerant refill
- Programmable service call alarm

Tri-Plex with WS2 Valves
ON 30x72 Tanks

Your Charger Water Treatment Dealer:
chargerwater.com
OPTIONS Available

- 2.0” NPT or 2.0” BSPT
- Durable 316 stainless steel casting
- Hydraulically balanced piston valve
- Allows for our 2” valves to be used in multi-tank systems
- Full 2.0” ports with minimal pressure loss
- Provides for no raw water bypass during regeneration
- Provides choices of treated or non-treated water regeneration for our 2” valves
- Proven and reliable AC drive assembly
- Low voltage drive assembly controlled by valve’s circuit board
- Flow from male inlet to female outlet has a 2.6 PSI drop at 125 gpm
- Operating pressures: 20 PSI minimum/125 PSI maximum
- Operating temperatures: 40°F minimum/110°F maximum

• 2” inline meter suited for commercial/industrial applications
• 316 stainless steel electro-plated construction
• Service flow range 1.5 to 150 gpm (5.7-568 lpm)
• Meter accuracy ±5%
• Reliable and proven turbine design
• 15-foot cable included

• System controller may operate 2-6 units
• Clack 1.0”, 1.25”, 1.5” or 2” control valves may be used
• No plug-in DC power supplies are required on individual valves; all connected valves will be powered by the system controller
• Remote, real time monitoring of system performance utilizing an onboard ethernet connection
• System diagnostic and programming information for spreadsheet presentation may be uploaded to a standard USB drive
• Two fused Single Pole Double Throw (SPDT) relays are provided
• Single demand-based meter output is provided
• Coin cell lithium battery backup for time of day
• Solid state microprocessor with user-friendly front panel programming
• Front panel displays for time of day, day of week, days until next regeneration, current system flow rate, and total system volume used (Totalizer)
• Front panel LED status indicators for online, standby, and regeneration
