

# HydroSplash 4-Stage RO System

**Four Stage RO with 50 GPD Membrane and proprietary twist-off filters.**

The Charger HydroSplash is an under-sink Reverse Osmosis filter system optimized to treat city water using the existing water pressure. This model makes up to 75 gallons a day of great tasting water while taking up less space than most other 4 and 5-stage models. Choose 4 or 5-stages of filtration to ensure premium water taste and quality. The easy twist-off disposable filter cartridges and RO membrane assembly are designed to make installation and replacement quick, easy and sanitary. Great for large service programs or for customers who like to do the filter replacement themselves. The HydroSplash comes complete, ready to install with connection hardware, tubing, faucet and instruction manual.

## Features and Benefits:
