

INTRODUCING Charger's Solution to Connected Water Treatment

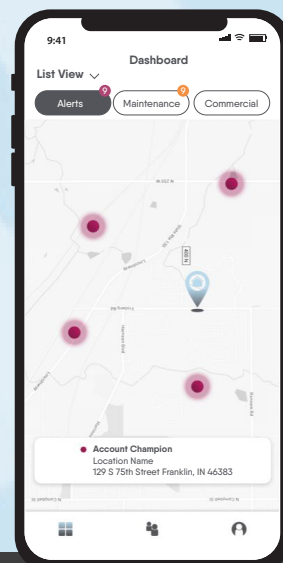

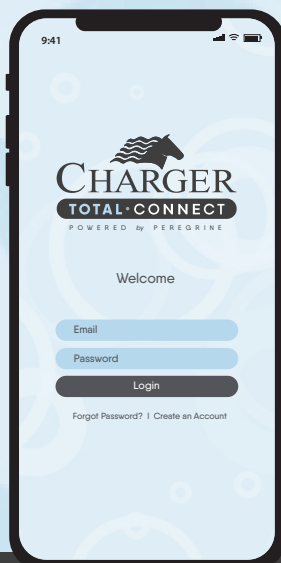

A FEW OF THE MANY

Benefits:

- Access to real-time data on the performance of your water treatment systems.
- Manage the maintenance needs of several locations from one device using our convenient service reminders.
- Set up your daily service schedule using the data from one source as your guide.
- Save travel time between locations, knowing at a glance when salt replenishment is needed.
- Retrofit to your existing products, where applicable.

*Make data driven
decisions for better
operational strategies.*
