

Why **SOFT** WATER?

Hard Water Produces Scale

Stains or buildup on your sinks and bathtubs, using large amounts of soap to clean dishes or wash your hair, or odd tasting or smelling water, are all results of hard water. If left untreated, the minerals in hard water will cause white stains on plumbing fixtures and be deposited as scale, eventually clogging plumbing and shortening the life of appliances like washing machines, water heaters, and dishwashers.

How the ChargerPro Clydesdale Plated System Softens Water

Hard water passes through the media tank that contains resin beads coated with sodium ions. The calcium and magnesium ions are exchanged for sodium (or potassium) ions, thus 'softening' the water. When the beads have trapped the hardness and need to be regenerated, the control valve charges them with the brine from the brine tank.

As regeneration occurs, calcium and magnesium (hardness) ions are freed from the beads, replaced with sodium or potassium ions and the system is ready to soften water again.

ChargerPro Series Water Treatment Systems eliminate the effects of hard water. They "soften" the water by removing the calcium and magnesium, extending the useful life of water heaters, coffeemakers, humidifiers, and household plumbing as well as many other appliances and fixtures that water passes through by as much as 30%.

How **OUR** WATER

Collects Contaminants

Your Water, The Universal Solvent!

Water is considered the universal solvent. As it passes from liquid to vapor and back again, it tends to dissolve everything it touches - whether in the air as water vapor where it can mix with sulfur from smoke stacks forming acid or from the ground, absorbing calcium, magnesium, sulfur, iron, lead, and limestone - water can have a negative impact on you, your household, and your pocketbook.

Depending on where you live, contaminants from sewage, industrial waste, and agricultural run-off can also seep into your water supply.

How the ChargerPro Clydesdale Plated System works:

ChargerPro Clydesdale Plated Systems make it easy to enjoy cleaner, healthier, better tasting water throughout your home. Whether for drinking, cooking, bathing, or laundry, this system will improve the quality of your water.

Your water could contain chemical contaminants from pesticides, petroleum, solvents, or a variety of sources. Some water contains lead, mercury, or other heavy metals. **This system has the option of a variety of media combinations to reduce these contaminants.**

With a ChargerPro Clydesdale Plated System, you can protect appliances, household plumbing, and your water heater by reducing sediment, sand, or rust that can damage plumbing and appliances. Its automatic filters can reduce iron, sulfur, and odor from your water supply 24-hours a day, in most cases, without having filter cartridges to change or chemicals to purchase.

Why Choose the ChargerPro™ Clydesdale SYSTEM?

- **Efficient Water Softening & Filtering:** The ChargerPro Clydesdale Plated System saves water and up to 40% in salt usage.
- **Durability and Reliability:** Known for its longevity and minimal maintenance requirements.
- **Customizable Settings:** Water Treatment Professionals can customize the system to meet your specific water usage needs.
- **Advanced Technology:** The control valve design provides optimum service and backwash rates.
- **Mid-plate:** Used for keeping medias separate.
- **Bottom-plate:** Used for maximum efficiency in regeneration of resin.

ChargerPro Clydesdale Valve Benefits

- Backlit screen for easy viewing
- Allows for downflow
- Battery time back up (keeps clock accurate in power outage)
- Learn one set of programming: one board is used for 1" and 1.25"
- Twelve preset programs available

ChargerPro Clydesdale - 1" Series Valve Specifications

Inlet/Outlet (1)3/4" to 1.5" NPS Adapter
 Cycles.....up to 5
 Valve Material.....Fiber Reinforced Composite
 Regeneration.....Downflow/Upflow

Operating Pressures
 Minimum/Maximum.....20 psi - 125 psi

Operating Temperatures
 Minimum/Maximum.....40° - 110°F

Brine tank performance insurance
 All Charger water softeners may be ordered with optional salt grid which helps to prevent salt bridging.
